Peter is absent as he is going to Armageddon. The meeting could not be moved as Aiden was told 11:40pm the night before

There is not much time left and the past week has not been as productive as Aiden would have liked.

The issue is lack of motivation due to lack of task assignment and deadlines (ad-hoc). Therefore, today there will be assignment of tasks and a clear deadline

Tasks By Sunday 25/10 Night

- Elisa:
 - Move IO out of ProfessorMgr into ProfessorMgrIO #66
 - Replace comparators in CourseRegistration with lambdas #62
 - Move "____ is called" into MainMenuIO instead of in the methods themselves #61
 - Use getter instead of accessing static List in StudentMgr, CourseMgr, etc #47
 - Create a GPA Calculator class #50
- Leon:
 - Create detailed tests for main menu #67
 - Create integration tests #65
- Sheldon:
 - Add enum for group and remove group subclasses. #52
 - Work with Sree to restructure based on Peter's comments
- Sree:

- Work with Sree to restructure based on Peter's comments
- Max:
 - Add interfaces for classes and use these interfaces in the code #33
 - Move GenerateStudentID from Student to StudentMgr #80
 - CourseValidator.CheckCourseExists() is overloaded and not descriptive #73
 - Add comments to MainComponentMark and delete unnecessary methods. #74
- Peter:
 - Change all manager classes to EntityManager instead of EntityMgr #46
 - Comparisons (.equal()) checks need to be made for several classes. #36
 - Comment StudentMgrIO #71
- Aiden
 - Move CourseMgr IO into CourseMgrIO class #60

Team conflict with Peter, as his PR was very late and not merged in. Peter is upset that it wasn't merged in by other people and says that the changes needed on that PR could be made after it was merged into master.
