Design Doc Breakdown

- Use case diagram (3)
- UML Class diagrams (2)
- Statistics: WMC, DIT, CBO (2)
- Writing up the design doc: what the system is at the moment

Should we do UML first before statistics or both at the same time?

- Can double check at the end if we do them separately.
- So do them separately

Extra person? UML

- Only so much you can do with UML

Extra person? Use Case

Decided to put extra person on the use case diagram
