Many many PRs were merged in the morning

Interfaces were added where appropriate

@Peter @Max @Sheldon variable/method names, then remove unused fields/methods/exceptions, make using Double vs double consistent, add comments, and then add interfaces
Could you please work on those issues in that order, which tries to minimise changes needed to UML statistics as fast as possible
These are very important to be able to write the report without changing anything

@Elisa
Work on UML diagram
Section 2
@Leon @Sree
Work on recording the PRs over the past few days, what design smells they fixed and which SOLID principle they used
Sections 1,3
@Aids
Work on getting new statistics
Section 4

Next Meeting

Next Agenda:
